

Starting **23rd** to **27th** March, 2026

# ARTIFICIAL INTELLIGENCE (AI) & THE FUTURE OF WORK FOR NGOS & DEVELOPMENT SECTOR **(COHORT II)**

5 Days | 2 - 3 Hours Daily | Virtual Live Classes | Reimagining NGO Work in the Age of AI

Generative AI | AI for Monitoring, MEL, Research | & Data Teams AI Automation for Fundraising, Communications & Grant Writing

Tools Covered

# Background & Rationale

 **Artificial Intelligence (AI)** is rapidly redefining how knowledge of work is performed across sectors. For non-governmental organizations (NGOs), this transformation presents a timely opportunity to **increase staff productivity, reduce administrative burden, improve learning and decision-making, and accelerate program impact**—while maintaining strong ethical, governance, and accountability standards.

 Despite growing interest, many NGOs struggle to move beyond awareness toward **practical, day-to-day application of AI tools** within program delivery, mon-

itoring, fundraising, communications, and operations. These gaps are often driven by limited hands-on exposure, skills constraints, and uncertainty around responsible adoption.

**The AI & the Future of Work in the NGO Sector** is designed as a **practical, practitioner-focused learning intensive** that equips NGO professionals with the knowledge, tools, and applied skills required to integrate AI meaningfully into their work.

# Programme Overview

This initiative is a **one-week intensive capacity-building programme**, delivered over **six days (Monday–Saturday)**, with **two-hour live sessions per day**. The programme combines **expert facilitation, live demonstrations, applied use cases, and interactive discussions**, with a strong emphasis on immediate workplace relevance.

Sessions will be co-facilitated by **experienced AI practitioners and development sector experts**, creating a collaborative learning environment grounded in real NGO contexts.

## Organizations Previously Trained

# Session Themes

## **Generative AI & the Future of Work in NGOs**

How generative AI is reshaping NGO roles, workflows, and productivity across programs, leadership, and operations.

## **Prompt Engineering for NGO Productivity & Reporting**

Practical techniques for using prompts to support reporting, proposal writing, donor communications, presentations, and internal documentation.

## **Agentic AI & AI Agents for Program & Operations Teams**

Understanding AI agents and agentic workflows for task coordination, research support, and operational efficiency.

## **AI Automation for Fundraising, Communications & Grant Writing**

Applying AI to donor research, storytelling, fundraising pipelines, and grant development—responsibly and effectively.

## **AI for Monitoring, MEL, Research & Data Teams**

Using AI to strengthen data analysis, visualization, learning, evidence generation, and adaptive management.

## **AI Ethics, Governance & Responsible AI in the NGO Sector**

Addressing bias, data protection, accountability, governance frameworks, and ethical risks in AI adoption.

# Target Audience

- ✓ NGO leadership and management teams
- ✓ Programme and technical staff
- ✓ Monitoring, Evaluation, Accountability & Learning (MEAL/MEL) professionals
- ✓ Fundraising, communications, and business development teams
- ✓ Operations, research, and data professionals
- ✓ Academic and development practitioners supporting NGOs

## Programme & Fee Details

**Duration** **5 Days** (virtual live classes)

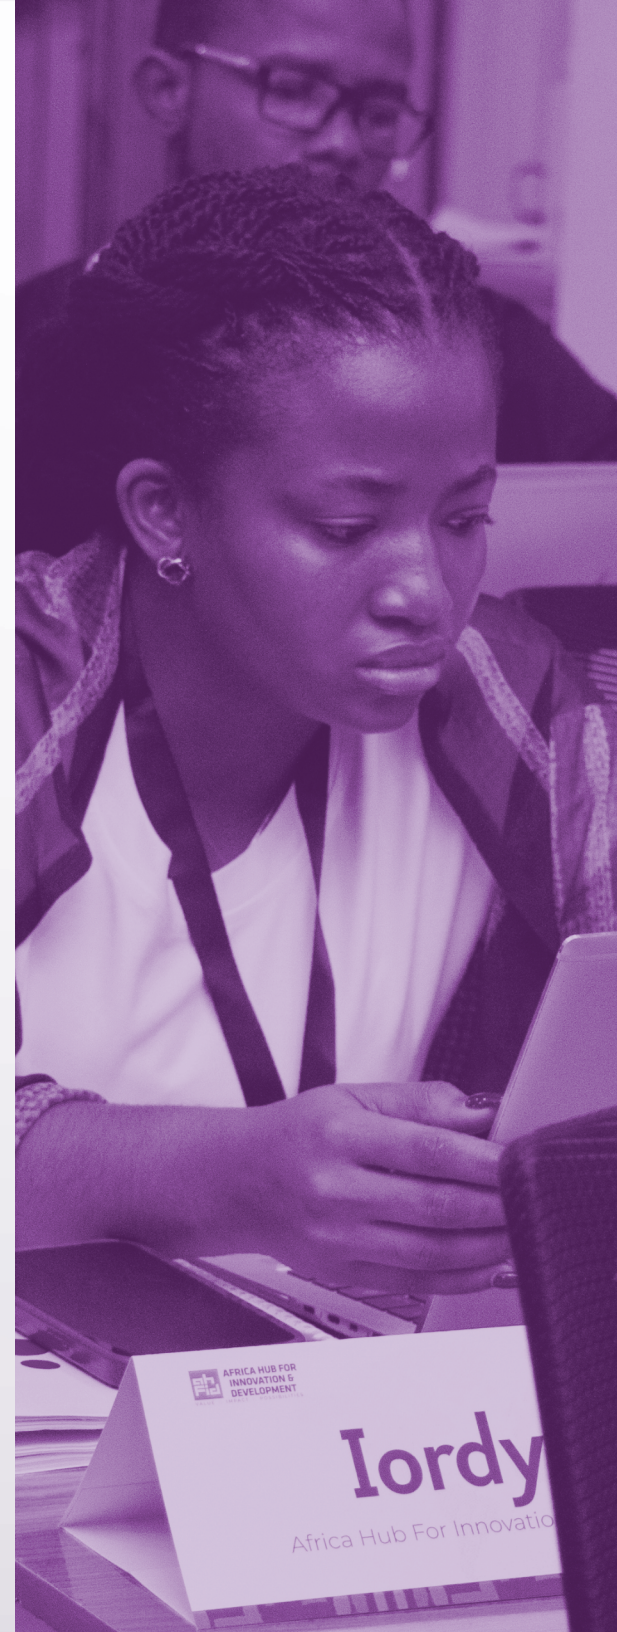

**Fee** **₦250,000** (for Individual), **₦300,000** (for Organization)  
**(\$200)**

### Prerequisites

Basic digital literacy and an interest in using technology ethically to improve program delivery, monitoring, and community impact—no prior coding or AI experience required

### Fee Covers

- Access to all six live sessions
- Expert facilitation and guest speakers
- Learning materials and practical resources
- Post-session reference tools and curated resources

# Partnership & Facilitation Model

The programme is structured as a **collaborative partnership platform**, engaging:

- Strategic institutional partners
- Guest facilitators with deep AI and NGO sector expertise
- Development and technology practitioners contributing applied insights

Partners and facilitators will receive **speaking visibility, co-branding opportunities, recognition across programme materials, and post-event promotion**, while contributing to sector-wide capacity strengthening.

## Expected Outcomes

Participants will:

- Understand how AI is transforming NGO work and skills
- Apply AI tools to improve productivity and efficiency
- Design effective prompts and AI-enabled workflows
- Identify opportunities for automation and AI agents
- Navigate ethical and governance considerations confidently
- Leave with practical tools and actionable knowledge

# Delivery Format

- Virtual (**live, interactive sessions**)
- **2 – 3 hours per day | 5 consecutive days**
